EXPERIENCES

Embraco

Feb.2021 – Current

SnOE Mid Level Analyst at Logistics Department

Joinville, SC

- As a leader of the planning team, I played a critical leadership role, responsible for crucial demand balancing and raw material management strategies.
- I implemented process improvements through the use of data manipulation tools and automation with JavaScript, optimizing the time and quality of the team's work.

Embraco

Dec.2018 – Jan.2020

SnOE Junior Analyst at Logistics Department

Joinville, SC

- Provided support to the S&OE team in operational demand analysis tasks, attending meetings with sales representatives from each market segment to refine each client's forecast.
- Developed automation tools for the demand planning process, utilizing Excel and VBA expertise, which resulted in a significant reduction in processing time.
- Developed and managed performance indicators using Power BI and Google Datastudio tools.

PROJECTS (for more, check my portfolio or GitHub)

[Portfolio Website](#) | *React, Typescript, Tailwind, Firebase, Framer Motion*

April 2023

- Developed a portfolio website to showcase my projects utilizing React as frontend Framework, Firebase as backend for messages and hosting, Tailwind for styling and Framer Motion to animate the components.
- Used a mobile first approach to achieve responsiveness between mobile resolution and HD resolution.
- Incorporated the Firebase extension 'Trigger Email from Firestore' to handle messages sent from the website

[Wassup](#) | *React, Typescript, Firebase*

March 2023

- A Google Chat inspired web messaging app. Built with React + Typescript and Firebase as backend.
- Incorporated Auth login method to log in users data. Registering their name, email and avatar picture, allowing interactions with any user that logged at least once in the app.
- Structured a public room for new user interactions, and functionalities to create private rooms and personal chats.

[Lynx Eyes](#) | *React, Javascript, Firebase*

February 2023

- Inspired by Where is Waldo, Lynx Eyes is a photo-tagging game in which you have to find the three characters in the least amount of time.
- Developed an algorithm to verify user click coordinates relative to the background image, as well as making the crosshair aim size proportional to the window size.
- Integrated Firebase as a backend to create a persistent leaderboard of user scores.

EDUCATION

Universidade do Estado de Santa Catarina - CCT

Aug.2013 – Aug.2021

Bachelor's degree in Production and Systems Engineering

Joinville, SC

SKILLS AND INTERESTS

Skills: Critical thinking; Emotional stability; Process optimization; Task prioritization; Programming.

Knowledges:

- Languages: Advanced English, Fluent Portuguese, Basic Spanish
- Tech Stack: Typescript, React, Tailwind, Firebase, Framer Motion, Jest
- Other knowledges: Python, SQL, Excel, Google Sheets, SAP, Power BI, Datastudio, Qlik

Interests: Self development; Healthy habits; Investing; AI; Discovering new places; Negroni.
